

Craig-Moffat County Airport is an active public air transportation center that is open year-round for commercial and private traffic.

The general aviation airport hosts 10,000 or more operations each year.

The airport's ideal geographical location in scenic Moffat County in Northwest Colorado offers easy access to some of the best hunting and fishing in the world.

Recreation opportunities abound in Moffat County and the airport is the perfect portal to enjoy its beautiful uninhabited expanses. Taxi service is also available to commute to numerous local restaurants and hotels.

Completed in 2008, the new terminal boasts conference space, a lobby and handicapped-accessible restrooms. The new terminal rounds out our fully operational modern facility.

The Craig-Moffat County Airport is located on 373 acres 4 1/2 miles outside Craig, Colorado and parallels our 18-hole golf course.

Existing aeronautical facilities at the Airport includes one primary runway oriented 7/25 (northeast/southwest).

Runway 7/25 is paved with asphalt and is rated at 35,000 pounds for aircraft with single wheel gear and 40,000 pounds with aircraft with dual wheel gear.

Two access taxiways connect runway 7/25 to the aircraft-parking apron and building area. There are two turnaround taxiways on the runway.

The aircraft-parking apron consists of about 19,000 square yards of asphalt, with 60 tie down anchors installed in the tarmac.

The Craig-Moffat County Airport is Class G airspace and is a great place for touch and goes and practice without a lot of air traffic.

The airport offers full refueling services, short-term hanger space and reasonable tie-down fees. The first 15 days are free.

Our local airport supports Flight for Life™ transports to metropolitan hospitals and also supports the Bureau of Land Management for monitoring wildfires each summer.

**Elevation**  
6,199 Feet
