Overview
The Plan Direction provides the planning framework for future growth and development in unincorporated Moffat County, the City of Craig, and the Town of Dinosaur.

Guiding Concepts

The Plan Direction establishes six Guiding Concepts:

- Land use policy concerning the use of public land and public resources in Moffat County should protect the culture and nature of interests and the resources itself.
- Land use policy concerning private land in unincorporated Moffat County should sustain traditional land use activities and maintain existing character and culture.
- Land use policy in Craig should promote stable neighborhoods and commercial districts, and accommodate new growth or redevelopment activities.
- Land use policy relevant to Craig should provide guidance as to the levels of urban development, and how resources should be prioritized.
- Land use policy should address annexation when desired by both a property owner and the City of Craig.
- Land use policy should be established to guide the measured and harmonious development of Dinosaur.

Applicable details regarding the Plan Direction - its objectives (goals), policies and actions - are contained within the Moffat County/City of Craig Master Plan document.

Plan Areas
The Moffat County Direction map depicts six Plan Areas:
Public Land Area, Rural Character Area, Craig Community Area, Urban Development Area, Three Mile Plan Area, and the Dinosaur Community Area.

Further detail within the Craig area is provided on the Craig Plan Direction map, which focuses on future land use within the Craig Community Area, the Urban Development Area, and a portion of the Three Mile Plan Area.

Public Land Area
The Public Land Area encompasses approximately 60% percent of Moffat County and provides resources for hunting and east land management offices in Moffat County. The history and intent of Moffat County land use policy concerning the use of public land and public resources in Moffat County is to protect the culture and nature of County citizens and the resources itself.

Rural Character Area

The Rural Character Area is the private land areas of unincorporated Moffat County and provides resources for hunting and east land management offices in Moffat County. The history and intent of Moffat County land use policy concerning the use of public land and public resources in Moffat County is to protect the culture and nature of County citizens and the resources itself.

Craig Community Area

The Craig Community Area is defined by the incorporated boundaries of the City of Craig, consisting of stable neighborhoods and commercial districts, as well as areas where new growth or redevelopment activities can be accommodated. The Craig Community Area is shown in more detail on the Craig Plan Direction map.

Urban Development Area

The Urban Development Area corresponds to the future growth area of the City of Craig, where urban services are available or may become available. The Urban Development Area boundary is intended to provide guidance as to the areas of urban development, and not restrict private property rights. Future land use within the Urban Development Area is intended to honor existing zoning and regard all relevant laws.

Three Mile Plan Area

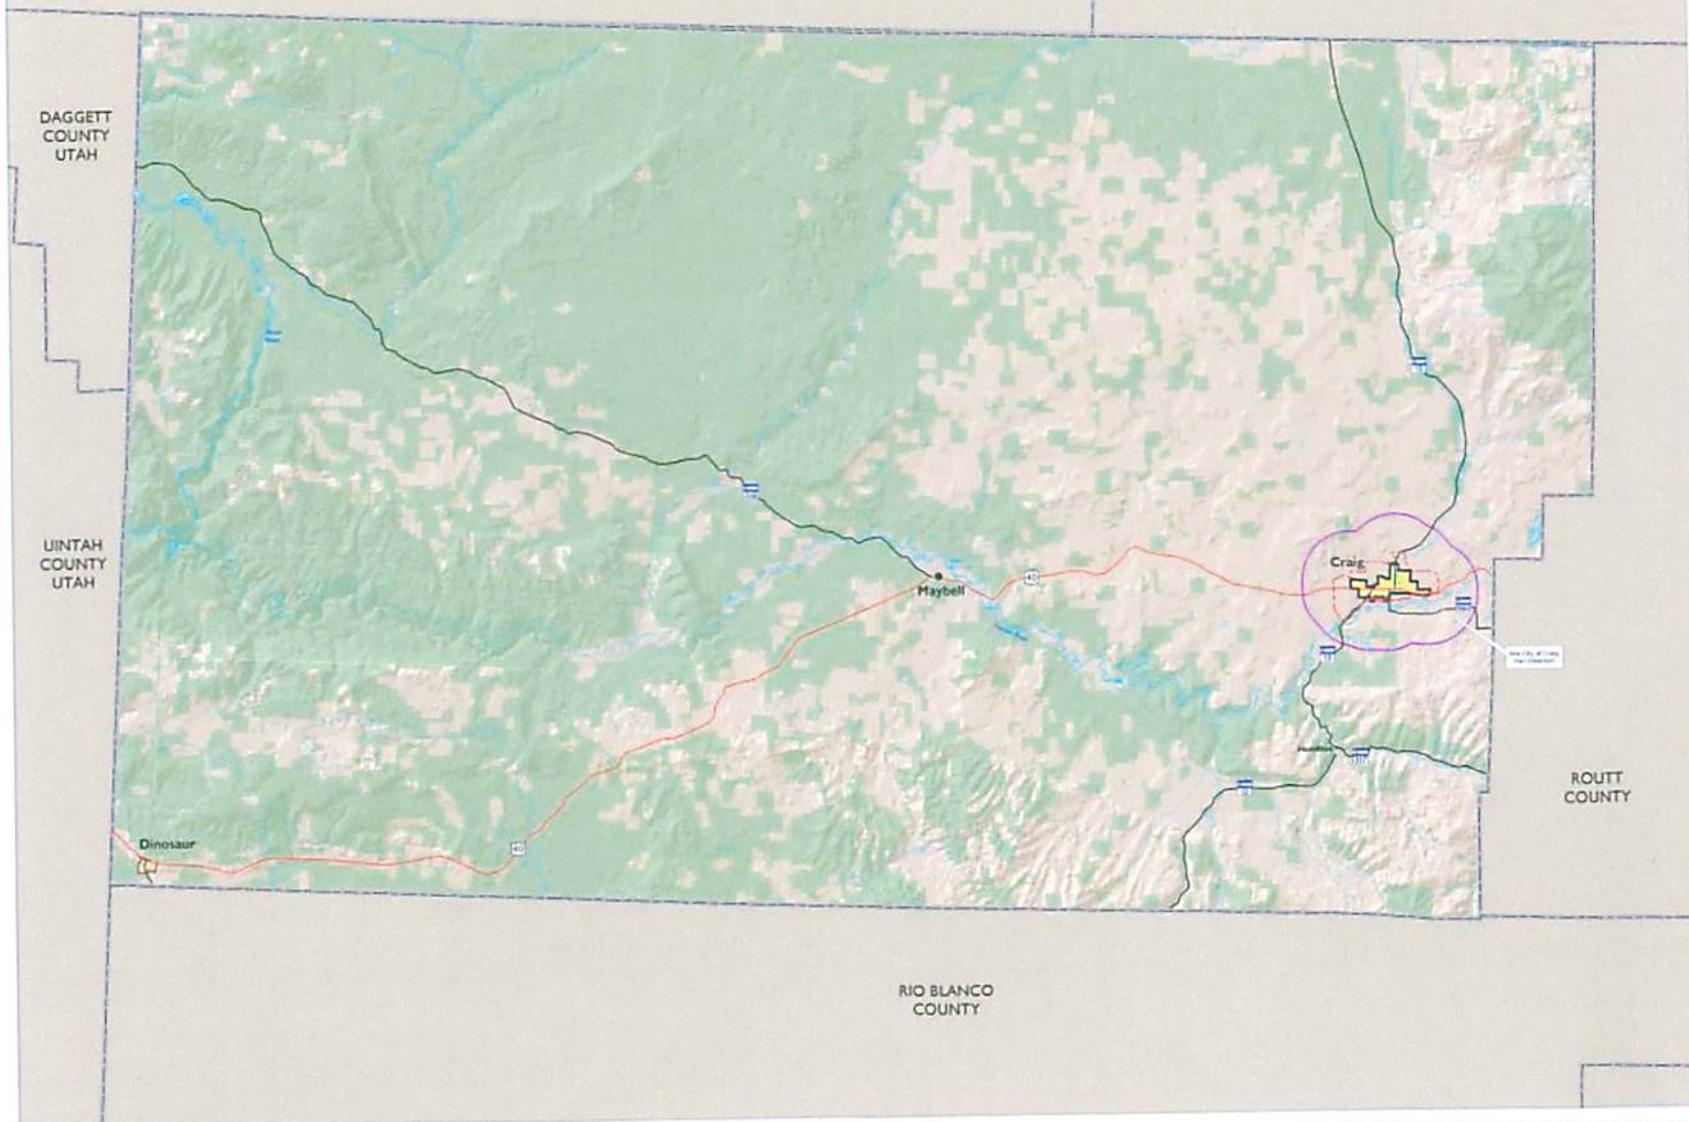

The Three Mile Plan Area is a three mile radius extending around the incorporated boundaries of the City of Craig. The Three Mile Plan Area is intended for one purpose only - to have Colorado state statute (C.R.S. 31-1-212(a)) in the event annexation is desired by both a property owner and the City of Craig. A portion of the Three Mile Plan Area is shown in more detail on the Craig Plan Direction map.

Dinosaur Community Area

The Dinosaur Community Area is defined by the incorporated boundaries of the Town of Dinosaur. Additional study is needed to evaluate land use and annexation policy for the Town, and to determine the Town's future growth area.
